BLONDE THINKING LEADS TO YEAR OF 'SCARLET' BEHAVIOUR

'Scarlet BLONDE' to give 12 months of aural pleasure!

Glasswerk New Music Award winners 'Scarlet BLONDE' are set to become the band of 2008 as they take their first step to accomplishing their ambitious scheme to have 12 releases in one year.

Scarlet BLONDE's plan is to release 8 singles, 1 EP, their debut Album 'Bedroom Superstars' and two 'B Albums'. The first is 'Bedroom Superstars [Raw]'- a Live album which will be recorded in March at Radio 2XS's Barn Sessions and will be accompanied by a documentary. The second is 'Bedroom Superstars [Roasted]' - an album containing the bands own remixes of the songs from the main album, with nothing new added to original recordings.

The First release, the 'Whenever Whatever Acid Planet remix EP' will be released world-wide on January 29th through HyperMEDIA Records/dPulse and will be available as a download from Amazon, iTunes and a host of other stores. It contains 6 tracks- the original version plus 5 remixes- personally chosen by the bands members DawnyVic and Ditch from hundred's of entrants to the Sony's Acid Planet Remix Competition which took place last Summer. "There were some fantastic remixes and we wanted everyone to hear some of them. So we decided to add them to a remix EP containing the best 5" DawnyVic, front woman of the critically acclaimed UK electro-indie-pop-rock outfit revealed. "The thing is, with most remix EP's you find yourself skipping through tracks because they all sound the same but with a dance beat, but it's not the case with this EP. Each remix sounds totally different to the others and would probably cover most peoples tastes in music. One has a dance feel - one is very electro - they're all very different from each other".

There will be a release from the band, every month of 2008. Next months release "I Don't Know" will be out on 29th February.
