

## ***New Software, Selkie Email Rescue, Targets Invaluable Email Documents***

Date: June 24, 2008

For Immediate Release

Email is a key communication tool in any business. It can be devastating to lose important emails and contact information. This week Tugboat Enterprises has released *Selkie Email Rescue*, a software program that will protect those invaluable documents, and allow users to retrieve crucial email files even when their computer's operating system is no longer functioning.

"We are excited about the release of *Selkie Email Rescue*," says CEO Judi Tyabji Wilson. "Too often passwords, contact information and other invaluable records are kept in emails and lost. In a business situation the loss of information like that can be perilous. This program will help people who thought there was nowhere left to turn."

*Selkie Email Rescue* supports files associated with common email programs such as Outlook and Outlook Express, as well as less common ones like Thunderbird and older ones like Eudora, Pegasus, and Linux applications such as kmail. It is unique in its ability to keep all emails it transfers in the same order as they were in on the original computer. It not only rescues trapped email files, but allows users to migrate email files from one working computer to another. This is useful for people upgrading to a new computer, or in a situation where two people need to share email documents.

*Selkie Email Rescue* is part of the *Selkie Software* suite of products, the flagship of which is *Selkie Rescue Migration & Data Recovery*. This powerful program allows the transfer or rescue of all files on a computer. It can bypass a non-functioning Windows operating system to recover data files with only three key strokes. It has received several industry awards and international acclaim (see [www.tugboatenterprises.com/awards.htm](http://www.tugboatenterprises.com/awards.htm)). It is quickly becoming the preferred software for fast, easy, secure data recovery when Windows stops functioning.

Tugboat Enterprises Ltd. is a software development company that specializes in file transfer and data recovery software. Other products by Tugboat Enterprises include ***Selkie Quick File Transfer, Selkie Photo Rescue, Selkie Music Mover, Selkie SOS (online backup)*** and **Selkie IT Edition**.
