

# AED Readiness Made Easy with AED Sentinel®

Use smart monitoring cameras instead of people to dependably check your cabinet-based and portable AEDs. Efficiently manage all your AEDs from one central dashboard.

## About AED Sentinel

AED Sentinel is a camera-based, easy-to-use 24/7 remote monitoring system that leverages cellular-connected technology to automatically inspect your AEDs and notify you when maintenance is required, or an AED is accessed. AED Sentinel's smart AED monitoring cameras are simple to install in cabinets or portable monitoring cases.

Setup and deploy quickly, no matter the size of your AED fleet

Ensure AED readiness with daily pictures of your AED status indicators

Know the status of all your AEDs at anytime from anywhere

Garner peace of mind and reduce compliance risk

### Capture

AED Sentinel internet-connected smart monitoring cameras capture AED status indicator pictures and "listen" for AED cabinet or monitoring case opening triggers.

### Alert

Email and/or SMS alerts about AED status changes, AED access, and battery/pad replacements are transmitted to designated AED Readiness Manager users.

### Transmit

Pictures and AED access triggers are transmitted via a secure cellular network to AED Readiness Manager for analysis and action.

### Manage

AED Sentinel users manage all remote monitoring services from the easy-to-use AED Readiness Manager software.

# AED Sentinel®

The Industry's Most Complete and Easiest to Use Remote AED Monitoring System

AED Sentinel is state-of-the-art technology designed to ensure the optimal performance of AEDs in any location where sudden cardiac arrest emergencies may occur. These settings include schools, public places, and workplaces – indoors and outdoors.

## The Best Way to Monitor Portable AEDs

AED Sentinel is the first and only system truly designed to remotely monitor portable AEDs. Custom portable monitoring cases and weather-resistant monitoring cameras keep mobile AEDs ready and protected, even during rough vehicle operations and outdoor emergencies.

## Discover the Benefits of AED Sentinel

- Easy to install and set up **smart monitoring cameras** work with all AEDs and will have you monitoring in no time
- **AED status indicator pictures** let you see that your AEDs are ready, or maintenance is required
- Easy to use online **AED Readiness Manager software** enables you to efficiently manage all your AEDs from anywhere
- **Secure cellular communications** mean no complicated IT or Wi-Fi setup challenges
- **Stationary and portable AED monitoring** in cabinets and portable monitoring cases helps keep your entire AED fleet ready
- **AED readiness notifications, battery and pad expiration reminders, and AED access alerts** let you know when action is required
- Low cost means you can remotely and reliably monitor your AEDs for **pennies per day**

## The Best Way to Monitor Portable AEDs

FEATURES

Wi-Fi Enabled AEDs

Communications	Secure, independent cellular network	Organization's IT protected Wi-Fi network
