**Dynalab Successfully Launches New Line Of Wire Harness Testers**

*Dynalab recently started shipping a new line of wire harness test equipment: the NX System. The NX System makes testing of wire harnesses simple, fast, and accurate.*

/24-7PressRelease.com/ -- Dynalab Test Systems, a leading manufacturer of test equipment for wire harnesses and cable assemblies, has successfully launched the NX System - the next step in wire harness testing.

The NX System consists of the NX Testers and the NX Editor software program. The NX Editor provides a means of programming the NX Testers using a simple flowchart.

NX Testers are available in 3 models. The NX Solo is a low cost tester with up to 256 test points. The NX Pro accommodates up to 512 test points and provides a bright vacuum florescent display. The NX Pro+ is an expandable version of the NX Pro tester, and offers a maximum capacity of 32,768 test points.

Each NX Tester is fast and accurate: a 2048 point wire harness can be tested in less than 8 seconds. Resistance measurement accuracy is +/- 1%.

The NX System supports serial communications to a variety of external devices such as label printers, bar code scanners, remote displays, and control devices. This enables the NX System to easily adapt to a variety of test environments. Networking capabilities are an upcoming feature.

The NX System is backed by Dynalab's excellent support capabilities. Free technical consultation is available from Dynalab's knowledgeable application engineers. In addition, Dynalab offers an extensive library of application notes and product documentation containing examples for solving common wire harness testing problems.

More information about the NX System is available at Dynalab's website [www.dynalabtesters.com](http://www.dynalabtesters.com) or by calling 1-800-SOS-DYNA (800-767-3962).

Dynalab Test Systems, located in Reynoldsburg, Ohio, is a leading manufacturer of wire harness test equipment for the automotive and appliance industries. Dynalab supplies test equipment to many of the largest wire harness manufacturers in the world. With over 17 years of experience and over 18,000 testers sold, Dynalab offers products that reflect a level of industry knowledge and experience unmatched by any competitor. The company's systems, software, and services are designed to help customers develop solutions for their testing needs quickly, reliably, and economically.
