Ship2Save's RFID Flagship Product Nominated for 2005 Microsoft World Wide Partner Awards

The newest version of Ship2Save's Operation Management System (OMS) has been nominated for the Small Business Initiative, Mobility Solutions, and Information Worker Worldwide Partner awards.

/24-7PressRelease/ - Montreal, Quebec, June 22, 2005 - The newest version of Ship2Save's Operation Management System (OMS) has been nominated for the Small Business Initiative, Mobility Solutions, and Information Worker Worldwide Partner awards. The application has been a part of the Ship2Save product portfolio since the company's inception. Growing from a RFID middleware application to a flexible and comprehensive RFID solution, compatible with an assortment of RFID readers, printers, and back-end systems.

Arsalan Ahmed, Director of RFID development and one of the key personnel responsible in developing the application has been witness to the evolution of this globally recognized RFID middleware.

"We're very pleased as to the positioning of our application in the global marketplace. These awards in many ways recognize this positioning, and the value of our application. In designing, developing, and upgrading OMS, we've always kept in mind our customers needs. We want to allow them easy-of-use, interoperability, and extendibility. We want OMS to aid them in their daily operations and not just be another application to complicate their lives."

The winners of the Microsoft awards will be recognized at the World Wide Partner conference on July 9th, 2005. The software giant has over 230,000 Partners worldwide, of which only a half-dozen have been nominated under each category.
