Likno Web Button Maker v1.3 has been released!

Create and customize impressive 2D and 3D buttons for your websites and projects with ease!

/24-7PressRelease/ - July 27, 2005 -- Likno Software announces the release of Likno Web Button Maker v1.3 . Likno Web Button Maker is a user-friendly software for creating unique and professional custom 3D web buttons for your web pages and projects fast and easy. With this innovative program you can design and create an endless variety of stylish 3D website buttons with different effects, backgrounds, and text options by customizing their dimension, text, size, shadow, lighting, texture, shape and more. You can choose from a range of pre-defined shapes and styles of web buttons ranging from plastic to metallic, or simply customize your own buttons by applying a variety of different custom features and effects to them. Impress your web site visitors by adding unique navigation buttons to your html pages, or simply transform your projects by applying stylish 3D web buttons to them. Guide your users to the desired "click" by making attractive buttons with this 3D button generator.

Among the new features that have been added in version 1.3:

- Optimized Feature - Adding Characters-Symbols to web button text.
- Optimized 3D engine.
- Enhanced Export feature and added option for CSS rollover effect in export 3-state button.
- v1.2 bug fixes.

The basic features of the program are:

- Setting the width and height of the web button.
- Setting the margins of the web button.
- Selecting the shape of the web button.
- Incorporating a background image or color to the web button.
- Setting and editing the reflection of the web button.
- Selecting texture for the web button.
- Adding lights to the web button and set their intensity.
- Adding shadow features to the web button.
- Adding and editing the web button shadow.
- Editing and adding text features and actions to the web button.
- Rollover Button Creation (Three-States: Normal, Mouse Over, Mouse Click).
- You may apply Copy-Paste values between the three-states.
- You may manually (mouse and keyboard) determine movement and resizing of button and its elements.
- Previewing the web buttons as they are being designed and customized.
