Psychsoftpc announces the 64 Bit Psyborg Extreme Workstation with Intel Dual Core Processor

Psychsoftpc, a Quincy, MA computer manufacturer, announces the 64 Bit Psyborg Extreme Workstation with Nvidia Quadro FX 4400 video card, Intel's dual core 64 bit processor, XP Pro 64 or SUSE Linux 64.

/24-7PressRelease/ - NORTH QUINCY, MA, September 22, 2005 - Psychsoftpc, a Quincy, MA high end computer manufacturer, announces the 64 Bit Psyborg Extreme Workstation with Intel Dual Core Processor. The 64 bit Psyborg Extreme Workstation is designed from the ground up to meet the demanding needs of Graphics Designers, Architects and Scientists who need to produce high quality graphic output in a short amount of time. Designed around the breathtakingly fast Nvidia Quadro FX 4400 video card with 512 meg of graphics memory, which offers the industry's highest performance for professional CAD, DCC, and scientific applications, and with a beefy 4 gig of DDR2 RAM running in dual channel mode, the 64 bit Psyborg Extreme Workstation can handle even the most graphics, multimedia and math intensive tasks with ease, leaving professionals more time to concentrate on the task at hand. The 64 bit Psyborg Extreme Workstation features PCI Express technology, a huge SATA hard drive, 2 DVDRW drives, an Antec 550 Watt Power Supply and a fast Intel 600 series P 4 dual core 32/64 bit processor. To take full advantage of all this technology, the Psyborg Extreme Workstation comes with a choice of either the Microsoft Windows XP Pro 64 bit operating system or SUSE Linux 64 bit operating system. What would all this be without sound? So, of course, the Psyborg Extreme Workstation comes with Logitech's Z 5500 5.1 Digital Surround Sound Speakers, for designing the full multimedia experience. With built in gigabit Ethernet and 802.11g wireless, hooking into the nearest LAN is a breeze. And the case not only looks cool, it is designed to keep the inside cool as well,utilizing Thermaltake technology in the case as well as on the processor. Because extreme computing is hot, literally. It's fast, it's powerful, and it's designed with uncompromising quality by the same folks who build the Psychlone Cluster Supercomputers. The 64 bit Psyborg Extreme Workstation, because performance matters.
