**Cannon PC Releases Two New Media Center PCs for Home Automation and Home Theater**

*Houston Texas based company, Cannon PC, introduces two new powerful media center PCs designed for home automation and home theaters.*

**/24-7PressRelease/** - SPRING, TX, September 30, 2005 - Cannon PC, LP announced that it is adding two new models to its line of Windows Media Center PCs. The new LX and EX models come in newly designed cases and are packed with more power, disk space and memory than previous systems. These units are specifically designed for home automation and home theaters.

Both models feature A/V rack mounting brackets for installation in A/V racks. The LX case features function control buttons on the front of the case to alleviate the frequent need for the media center remote. The EX series comes standard with a 7" Hi resolution color LCD touch screen which makes it ideal for the premier media closet or A/V rack.

"We have always heard that someday there will be a computer that will run you house. Well its here." says Gregg Cannon of Canon PC. "Our systems have been installed in homes to control lighting, provide distribution of audio and video to other rooms in the house, control and monitor heating and air conditioning, monitor security." "And all our units are rock solid."

"We are seeing more and more customers wanting to have a single system that they can use to control the entire house. They don't want separate solutions, separate vendors and separate technology. They want integration and simplicity. We have designed our new units to fill those needs." says Cannon.

All Cannon PC Media Center systems come standard with dual NTSC TV tuners, 1 HDTV ATSC TV tuner, 8 channel HD audio, 1 GB RAM, large SATA drives, state of the art NVIDIA graphics cards, dual layer DVD/CD burner, wireless and gigabit Ethernet, digital media card reader, USB 2.0, fire wire 400/800, Norton Anti-Virus 2005 and True Image 8.0 recovery software. Each of the units is completely customizable also.
