**Chassis Plans Releases Rackmount 8U 17" and 19" 1280x1024 LCD**

*Chassis Plans has released two new 8U rackmount LCDs at 1280x1024 resolution and complete input capability including analog RGB, DVI, S-Video and Composite.*

**/24-7PressRelease/** - SAN DIEGO, CA, April 28, 2006 - [Chassis Plans, The Original Industrial Computer Source](#), today released the [CPPM-8U17](#) and [CPPM-8U19](#) Series, high-performance 1280x1024 pixel resolution, SXGA, panel mount LCD display. These displays are optionally available with capacitive or resistive touch screens. These displays complement the CPPM-8U201 currently offered by Chassis Plans.

Designed to satisfy a wide range of industrial, commercial, broadcast and military requirements, the CPPM-8U17 display offers 250nit brightness and 350:1 contrast while the CPPM-8U19 offers 500:1 contrast for exceptional viewing ability. An anti-glare hard coating minimizes reflections making images that much clearer. The aspect ratio is 4:3 and both will display 16.7 million colors (True Color).

The CPPM-8U17 offers Analog RGB input standard and optional DVI, S-Video and Composite inputs. The CPPM-8U19 offers aRGB, DVI, S-Video and Composite as standard inputs. Front panel Source Selection and fast response time allow easy use for real-time video input on both the S-Video and composite inputs in addition to the computer input on either the aRGB or DVI inputs.

Key features of the CPPM-8U17 and CPPM-8U19 include:

- \* 17" or 19" diagonal active matrix SXGA TFT LCD, large viewing area display
- \* 1280 x 1024 @ 60 Hz native resolution display
- \* Video Input Connections: aRGB, DVI, NTSC, Pal S-Video and Composite Video
- \* On screen display (OSD) monitor controls
- \* Power management; EPS Energy Star, VESA DPMS
- \* MTBF: 30,000 - 50,000 hours

These displays are available in a standard black finish. However, as with all Chassis Plans' product offerings, a wide variety of custom options are also available such as color, customer logo, transmissive daylight modification, touch screens and hard-coated vandal shields.

The CPPM-8U17 and CPPM-8U19 are both currently shipping. For pricing and availability, contact Chassis Plans at 858-571-4330.

Chassis Plans is a specialized designer and manufacturer of award-winning custom and COTS rack mount computer systems and LCDs for critical industrial and embedded applications such as telephony, imaging, instrumentation, control and other environments which require performance, ruggedness and reliability.

Chassis Plans products are manufactured in the USA to CE and UL standards, satisfying the industry's increasing demands for features and performance. All Chassis Plans products are backed by a full two-year warranty and Chassis Plans' engineer-oriented technical support. Chassis Plans is recognized as the fastest growing technology company in San Diego.
