CRYPTEK RECEIVES \$3.5M AWARD FOR SECURITY SYSTEMS

/24-7PressRelease/ - September 11, 2007 - STERLING, VA (September 11, 2007) - CRYPTEK, Inc., a privately held manufacture and provider of security solutions announced the company has received an award for \$3.5M from a major Federal customer for Cryptek's Thin Client products. The equipment will support the customer's objectives to modernize their global information technology infrastructure to meet critical business requirements. Cryptek offers a series of Thin Client products for government users to fulfill TEMPEST Level I (AMSG 720B) and Zone requirements. The Thin Client products meet the requirements of NSTISSAM TEMPEST/1-92 Level I (NATO AMSG 720B) computing environments and feature a choice of 17" or 19" LCD flat panel display devices.

"This award is one of numerous that we anticipate in support of our customers with critical mission needs," states Glenn Ritzmann, VP TEMEST & Fax Solutions for Cryptek. "We are proud to be delivering quality products to support the government mission critical requirements."

"Secure systems solutions are a challenge that Federal agencies and DoD organizations face on a daily basis whether they are in a military operation in the field or in sensitive government offices. Cryptek prides itself on being able to provide critically needed and well engineered products," adds Bill Anderson, President & CEO Cryptek.

ABOUT CRYPTEK: Cryptek, Inc., a privately held developer, manufacture and solutions integrator is recognized as an industry leader of dynamic and trusted identity and access control solutions and TEMPEST products. With over 20 years of experience in developing and delivering security solutions, Cryptek has worked with numerous DoD & Civilian agencies. Partnered with the industries top software and hardware manufactures, Cryptek offers customers advanced security solutions to meet their ever growing needs. Current Cryptek solutions have been awarded an EAL 4 rating from Common Criteria (CC) and numerous cryptographic module evaluation certificates as part of the National Institute of Standards and Technology (NIST) Federal Information Processing Standards Publication (FIPS PUB140).
