**Micro Star Innovations Goes with ResourceMFG**

*Micro Star Innovations Goes with ResourceMFG*

**/24-7PressRelease/** - September 27, 2007 - According to Shawn McNary, Operations Manager for Micro Star Innovations (MSI), based in Largo Florida, "ResourceMFG staff are continually challenging themselves with finding the ideal candidates for our facility. This is accomplished by bringing in the staffing agents and putting them through a mock interview as if they were going to be running the machines so they can realize what the future candidates are going to be responsible for. ResourceMFG also has a specific test they distribute to qualify all potential candidates and I believe this helps with mechanical aptitude. Alex Vazquez, the branch manager, is a very good communicator and very easy to get along with and I believe this lends to a great partnership between MSI and Resource. MSI is proud to associate ourselves with ResourceMFG."

ResourceMFG ([www.resourcemfg.com](http://www.resourcemfg.com)) recognizes the core competencies of recruiting, screening, hiring, placing and retaining a temporary workforce. ResourceMFG has to be proactive in training the skilled electronics workforce of tomorrow and partnered with Blackfox Training Institute to provide and end to end solution to the Electronic manufacturing sector. This solution provides a qualified, certified, contingent workforce which is more productive for customers; it also creates great opportunities for trained employees. With the growing demand for skilled employees in the electronics industry this strategic partnership provides a seamless solution.

ResourceMFG is involved with the total spectrum of manufacturing positions including production, quality, maintenance, supervision, and all levels of management. The company serves a wide variety of industry segments that include automotive, electronic, machining, sheet metal, fabrication, and many other specialized producers. Manufacturing is the sole focus of ResourceMFG allowing a better manufacturing workforce.

McNary, also noted, "Most of the other staffing agencies that I contacted did not specialize in Manufacturing which made it more difficult to get them to understand our needs for specialized labor to efficiently produce insert molded products.

ResourceMfg has consistently provided specific labor to meet our needs."
