SmarrCopy Introduces OPA 802 Portable CD/DVD Duplicator

SmarrCopy introduces its newest product, the OPA 802 Portable CD/DVD Duplicator.

/24-7PressRelease/ - October 01, 2007 - Now the standard for quality among DVD Duplicators, SmarrCopy introduces its newest product, the OPA 802 Portable CD/DVD Duplicator. Supporting today's fast-paced and individualized lifestyles, the OPA 802 combines eye catching design and ease-of-use in a truly portable quality duplicator, expertly designed to support all popular DVD and CD formats.

The OPA 802 is the perfect answer for i-generation home and office use and wherever a portable solution for low volume duplication is needed. It is equipped with two 18X Pioneer drives in an easy to operate controller panel. This standalone portable with the efficient handle provides 1-2 target DVD/CD duplicators ready to copy any type of data video and audio. The OPA 802 comes with a USB 2.0 connection, making it easy to connect to a home PC as an external storage device.

The SmarrCopy OPA 802 is a fashionable, affordable and dependable portable that brings all the technological features that have made SmarrCopy DVD Duplicators famous in a format that is simple, flexible and always available to support your special lifestyle.

About SmarrCopy

SmarrCopy is Utronics' revolutionary new line of DVD⁄CD Duplicators that enable businesses and individuals to produce quality media copies in a flexible platform in any quantity and at the fastest speed and lowest cost. SmarrCopy's high-performance, standalone systems feature automatic calibration that independently adjusts master drive speeds so discs are read correctly and finish error free. SmarrCopy products are the ultimate in quality, ease of use and compatibility, with the ability to write across different media and a wide variety of disc formats.
