**Belview Technologies releases new slim PC line - SP4800**

*Belview Technologies has released a new series slim computer in vertical markets, specially targets customers in POS, hospitality, and industrial markets.*

**/24-7PressRelease/** - FREMONT, CA, November 14, 2007 - Belview Technologies has released a new series slim computer system - SP4800 in all vertical markets. This new series computer replaces the company's current SP4400 & SP4200 series slim/booksize PC systems.

The key features of this new computer system include:

- Compact chassis design (14.3" x 12.2" x 3.8")
- Micro ATX form factor
- Support CPU from Intel Celeron 2.0GHz to Core 2 Duo 3GHz
- State of Art CPU cooling system
- 2+1 low profile PCI slots for add-on cards

This slim PC system was designed for POS, hospitality, self-service Kiosk, and other industrial use. The standard configuration of this system starts from Intel Celeron 3.0GHz CPU, 512MB DDR2 RAM, and 80GB SATA Hard Drive. Customer can choose the optional CD-ROM drive, floppy, or add-on PCI cards (in low-profile size) for their application. As a value added solution provider, Belview will preload the operating system (Windows XP, WePOS, Windows 2000, etc.) per customer's request. To reduce any downtime and protect your investment, the company offers optional up to 3-year warranty coverage and Advanced Replacement program to the customers.

For POS/hospitality customers, Belview is also offering an economical POS bundle package, including

- SP4800 slim PC system w/ Microsoft WePOS system
- LM1560 15" Touch screen LCD monitor
- CD4141 cash drawer
- Epson/Star receipt printer

Belview also offers a high-end industrial computer solution in this same chassis for the mission critical applications and environments. It is empowered by Intel 965 system chipset and along with industrial grade components. This is an excellent choice for those who are looking for reliable industrial grade computer at more competitive price.
