Recycle the Couch - Save the Handbag - Vamoose Tobacco Odors on Leather

Las Vegas, NV at the Consumer Electronics Show— January 8, 2008 — Vamoose with patented Novexium , permanently removes tobacco odors leaving a pleasant leather scent, is now available from Vamoose Products.

/24-7PressRelease/ - AUSTIN, TX, January 08, 2008 - Trade Cigarette Odor for Leather Scent with Vamoose

Las Vegas, NV at the Consumer Electronics Show— January 8, 2008 — Vamoose with patented Novexium , permanently removes tobacco odors leaving a pleasant leather scent, is now available from Vamoose Products. Specially formulated for leather goods including; couches, handbags, car seats, boots and shoes, hats and other leather products which have been exposed to second hand smoke from cigarettes, cigars, and pipes, Vamoose molecularly combines the nicotine and tar residues left from tobacco products.

More than an air freshener or perfume which temporarily masks odors, Vamoose molecularly combines with the tar and a nicotine molecule deposited by smoking and converts them into inert matter thus neutralizing their ability to emit odors. During the conversation process a "Leather" masks the molecular conversion and indicates that the conversion process is active.

Available in spray bottles with 4, 16 and 32 ounce treatments for \$9.99, \$19.99 and \$29.99 the Vamoose with Leather scent will be available in January in recyclable bottles and an environmentally friendly gallon refill. Products can be purchased from the company's web site at [VamooseProducts.com](#). Retail, distributor and commercial inquiries are welcome.

"I was skeptical about the claims made for Vamoose but we were getting desperate. My daughter purchased some high-dollar leather furniture that had been stored in a garage where a smoker was banished to when he smoked. With the garage door open, she did not detect the smell when she purchased the sofa, chair and ottoman but once the furniture was brought into her heated home, the odor was VERY noticeable. So bad she removed the furniture from her house because, in her words, of the "overpowering stench". We tried several products available at big box home supply stores that claimed they would remove odors, specifically tobacco smoke odor. All they did was mask the odor with a heavy sent of their own, leaving us with TWO odor problems, one on top of the other!

We tried your product and at first were disappointed to discover that it too had a fairly heavy floral sent. But there was one major difference. Almost instantly, the tobacco odor was GONE, no longer detectable by even the VERY sensitive nose of my daughter. We waited 24 hours, lightly cleaned off the Vamoose residue with saddle soap, let that dry, and success! The expensive furniture is back in the house with only the faintest floral sent and NO tobacco smoke odor. I expect the light fragrance from the Vamoose and possibly the other products we used will completely dissipate with a few days more time.

In this day and age, your product is unique in that it does what you claim it will do. Thank you for a fine product." said Robert S. a Vamoose customer.

About Vamoose Products

Vamoose Products is exclusive to Hill Country Distribution which is a licensee of the patented Novexium technology. Vamoose, when used properly, completely eliminates all second-hand tobacco odors.
