Network 1 Sets O'Fallon, MO Wireless South Side Launch for February 1, 2008

The O'Fallon Wireless network provides residents and visitors the ability to access the Internet from any home, business or public area within the city of O'Fallon. O'Fallon, Missouri is the first municipality in the area, and among the first in the country, to implement a wireless network.

/24-7PressRelease/ - DARDENNE PRAIRIE, MO, January 10, 2008 - Network 1 has announced the launch of Phase 2 of the O'Fallon Wireless project. The wireless network is scheduled to go live in the city south of Highway 70 on February 1, 2008.

Phase 1 of the O'Fallon Wireless network, powered by Network 1, was successfully launched on October 19, 2007, and included the areas north of Highway 70.

Along with the Phase 2 launch, O'Fallon Wireless will offer special promotions for new subscribers in all areas of the network's coverage area. New subscribers will receive their first month of service free upon activation. Three packages, all based on connectivity speed from 1 mg to 6 mg, are available ranging from \$19.95 to \$34.95 per month.

Mark O'Neal of Network 1 encourages residents to contact O'Fallon Wireless's customer service center at 636-614-1364 with any questions about availability or adding the service. The O'Fallon Wireless Network can be used through a home network, and in commercial and public spaces throughout the city.

The expansion of the O'Fallon Wireless network, powered by Network 1, furthers the mission of providing residents and visitors the ability to access the Internet from any home, business or public area within the city of O'Fallon at affordable rates. O'Fallon, Missouri is the first municipality in the area, and among the first in the country, to implement a wireless network. Since its launch in October, 2007, it has attracted the attention of municipalities from across the country. Other cities throughout the St. Louis area are currently considering the installation of a wireless network modeled after the O'Fallon Wireless project.

O'Fallon Wireless, powered by Network 1, was created to provide a cost efficient alternative to the residents and businesses of O'Fallon. The Network 1 management team has been in the communications and technology industry for over 15 years, and its engineers and executive management staff members have worked for some of the largest telecom companies in the world. O'Fallon Wireless, powered by Network 1, combines an easy to install, low cost service with high quality proven technology.
