TCT introduces innovative solutions for Business Communications

TCT is a leader in providing total call management solutions such as autodialers, call center solutions and many more.

/24-7PressRelease/ - PHOENIX, AZ, January 23, 2008 - TCT Corporation, a leading name in providing call center management software solutions, today announced the launch of its revolutionary call center solutions for simplifying business communications. The new business communication solutions are compatible with all types of businesses irrespective of their nature of work.

Designed to operate a myriad of business communication functions, these call center solutions are efficient in handling and managing various regular business activities such as transmitting callers to the concerned departments immediately, professional distribution of information, effective collection of information from the employees, effective communication leading to more productivity etc.

"Consistent introduction of new business communication services for the betterment of businesses has always been a priority for TCT," remarked Mr. M. Kapoor, Online telecommunication marketing domain expert. "We frequently turn to our growing client base in order to ensure that developments of various services are in-line with expanding client requirements." As per the company sources, call center solutions free you from customer frustration, inefficiency and loss of present and future sales. The technology behind the call center solutions is quite compatible with all sorts of business environments. Company said advanced call center solutions provide complete flexibility and support to agents in managing outbound as well as inbound call volumes efficiently.

TCT is a leader in providing total call management solutions such as autodialers, call center solutions and many more. TCT has been identifying the comfort and flexibility of CTI products and offers a broad collection of avant-garde technology for handling inbound as well as outbound calls. TCT permits more receptive and prolific customer interactions.

With its dedicated and passionate team of computer software engineers, TCT has been determinedly providing more proficient and modified call center solutions as per the industry requirements.
