ADVANCE SKIN CARE TIPS and SKIN CARE TREATMENT for 2008 BY Dr. Stuart Kaplan

Dr. Stuart Kaplan, a renowned Beverly Hills Dermatologist, and creator of kaplanMD, has identified 3 types of skin aging caused by Time, Hormonal Imbalances, and Environmental Damage.

/24-7PressRelease/ - BEVERLY HILLS, CA, January 30, 2008 - Most skincare products focus only on anti-aging and environmental protection. Yet many skin symptoms are in fact the direct result of hormonal imbalances, specifically, estrogen loss.

Studies show that men and women begin experiencing hormonal imbalances at each transition in our life. Starting in our late 20's, hormonal imbalances cause skin aging different from symptoms caused by chronological or environmental damage alone. Dr. Kaplan is the first to identify the 3 types of skin aging, as well as the 12 skin symptoms associated with hormonal imbalances.

Only kaplanMD skincare is clinically proven to prevent and treat all 3 types of skin aging. Every product contains no less than 10 active ingredients, including a restorative blend of patented peptides, amino acids, and vitamins. Every kaplanMD product also contains the exclusive Phytogenic Triactive Complex, of organic Soy, to firm and plump skin, Grapeseed extract, a powerful antioxidant to fight free-radicals, and exotic Black Cohosh, to help treat the skin symptoms caused by hormonal imbalances.

These ingredients are then delivered deep within the skin using a patented Time-Release Microsphere Delivery System, previously found only in prescription medications. With 10 active ingredients per product, kaplanMD is a true 'balanced diet' for your skin giving you the benefit of a dozen skincare products in just 1 convenient application.
