While attending the show, visit the NiteLites booth where lighting designer and owner, Steve Levine and his staff will demonstrate NiteLites' high quality lighting fixtures, and will answer homeowner questions about the NiteLites Outdoor Lighting Systems. An impressive collection of lighting project photos will be on display, and Mr. Levine will also address specific lighting needs for homeowners who bring drawings of their property to the show. One of Mr. Levine's passions is extending living space with the use of NiteLites low voltage, specification grade outdoor lighting.

Landscape lighting systems are becoming increasingly popular and with good reason. An outdoor lighting system brings a number of benefits to the homeowner - an increase in property value, unsurpassed curb appeal, expanded living and entertainment areas, low cost operation because the systems use low voltage fixtures, and expandability. Perhaps the most important benefits that an outdoor lighting system can provide are safety and security.

A poorly lit path, step, or driveway can lead to accidents that can be avoided. A well-lit walkway allows your family and guests to see potential hazards and enables them to avoid those hazards. A professionally designed and installed outdoor lighting system provides a walkway that is illuminated adequately to provide safety, but subtly enough to avoid a high intensity, runway effect.

At the same time, landscape lighting not only highlights the features of a property owner's yard, it also eliminates the "dark spots" that intruders could use and be unnoticed. Potential intruders prefer to work in the dark, and not to be noticed. By eliminating the dark areas in the property, a homeowner lowers the chances of being a target of these potential intruders, thus making the home and the property more secure.

NiteLites is an industry leader in the low voltage outdoor landscape lighting field, and specializes in both residential and commercial installations. The company has been in business since 1998, and offers complete outdoor lighting service - from planning, through installation, to a comprehensive maintenance plan, ensuring the ongoing enjoyment of its lighting systems.
