Just a few of the facts, features, and specs of the MINI Clubman include:

- * Dynamic Stability Control—a motorer's best friend having proven to dramatically cut down on accidents.
- * Club door- small, reverse-hinged third door provides easy access to the rear seats and beyond.
- * Split rear barn doors- 32.58 cubic feet of cargo space including 100% flat load floor and hidden storage compartment. The split rear barn doors are roomy accessible, and ingenious.
- * Sport Button—the sport button adjusts various settings for your MINI to provide more rapid acceleration response and tighter steering. It is also known to motorer's as the "yyiipppeeee" button.
