Online Poker Echeck- New Online Poker Deposit Options, Replacement for US Citadel

www.RoyalPokerPros.com has just released an information page that explains the new poker deposit option called Instant Echecks. It answers questions regarding this deposit option and shows which poker sites currently accept them.

/24-7PressRelease/ - March 27, 2008 - Online poker instant checks are the newest way of depositing for online poker. They are also the replacement for US Citadel echecks. They are a fast, easy and secure way to deposit money on your favorite poker site. Simply enter your account and routing number from your bank account. It is very easy to use and has similarities with PayPal. You will enter your account number, routing number, and the deposit amount into the entry fields on the deposit page.

[RoyalPokerPros.com](#) is very excited about this new way of depositing money as it will make access to funds much more accessible. Unlike Paypal however, your funds will be available to use even before your transaction clears. Online poker echecks have various laws regarding electronic and paper transactions. These laws are for the protection of the depositor and financial institutions. There are only a few sites that offer online poker echecks. They are great online poker sites and are leaders among online poker rooms. They have very user friendly software and a wide selection of games. Although these are currently the only sites offering the online poker echeck option, this is sure to be the next generation of poker transactions and more poker rooms will be sure to offer them. [RoyalPokerPros.com](#) has site reviews and bonus codes for poker rooms accepting instant echecks.

Citadel no longer accepts US transactions since the Unlawful Internet Gambling Enforcement Act UIGEA law was passed in 2006. This law prevents banks from sending transactions to gaming companies. However, it is important to remember this does not affect third party facilitators such as Instant Echecks. (Learn more about this law at [US Poker Law](#))

Instant Echecks work the same as Citadel echecks. They are just as fast, safe and reliable as Citadel echecks, but are available to US players.

To find more information about poker echecks and the sites that offer this deposit option visit [www.RoyalPokerPros.com](#)
