**The Maynard is the dogs!**

*Peak District boutique hotel, The Maynard, is the dogs for pet owners wanting to pamper their pooch.*

/24-7PressRelease/ - March 28, 2008 - Peak District boutique hotel, The Maynard, is the dogs for pet owners wanting to pamper their pooch. The hotel has announced that it will be offering short break packages aimed specifically at dog owners, who will be made more welcome at The Maynard than in many other establishments.

Paul Downing, director of The Maynard, said: "The Maynard is in such a perfect location for walking your dog, it would be a shame for dogs in particular to miss out on the countryside surrounding the hotel.

"There should be no reason why pet owners can't enjoy a good quality hotel with their animals, yet there is a dearth of hotels prepared to take pets, as we have found to our own cost in the past. The price of putting pets into kennels can be significant, and many owners naturally prefer not to leave their pets in the hands of strangers.

"We believe most pet owners are responsible and the vast majority of pets are well behaved. Within reason, therefore, we will welcome pets to our newly refurbished boutique hotel, provided they are kept under control and provided it doesn't spoil the enjoyment of other guests.

"If you are considering a stay at The Maynard and you have pets, the best thing to do is call us with your requirements and we will see if we can accommodate them."

No pets will be allowed in the restaurant at any time, however they are welcome in the bar area. For further information, call Paul or Liz Downing on 01433 630321.
