**New Payroll Software Customized for Small Businesses by Small Business Owners**

*New Payroll Software is arguably the best and easiest in the business.*

/24-7PressRelease/ - LOUISVILLE, KY, March 28, 2008 - The champagne has barely lost its chill from ringing in the New Year, but already small business owners are stressing over the looming tax season. But 2008 should be a year to celebrate for those who hate to do taxes and get overwhelmed by accounting and payroll headaches, thanks to newly revamped payroll software from ezPaycheck.

The affordable, super-simple, custom streamlined payroll and tax software - available at <http://www.halfpricesoft.com/index.asp> - was designed with direct input and guidance from those who use it "in the trenches" every day. The newly upgraded version of the already popular product was updated with new state and federal tax tables, plus other intelligent changes recommended by customers.

"We believe payroll and tax software should be designed for the non-technical people who are actual end-users," explains Mark Ge, President and Founder of ezPaycheck. "We always keep in mind that our customers are small business owners, not computer whizzes or financial gurus. But that makes them the best possible people to listen to when designing payroll software, so we include them as members of our design team."

2008 features based on recent customer feedback include fresh new report formats, label changes, and the elimination of minor report display and printout "bugs". The software can be used to report employee wages and salaries to federal, state, and local agencies, with a duplicate copy for the employee. Users also now have the option of manually adding local tax information for jurisdictions such as California, where this is particularly important.

A sample company database eliminates the need for configuration of the software. You simply install it and it is automatically ready to print the first sample check, on either blank computer checks or preprinted checks. The payroll software automatically calculates Federal Withholding Tax, Social Security, Medicare Tax and Employer Unemployment Taxes, and includes built-in tax tables for all 50 states and the District of Columbia.

With ezPaycheck you can also simultaneously manage payrolls for multiple companies. Thanks to this multi-tasking feature, ezPaycheck software is even used by professional accountants to help process multiple client workloads at the same time. Best of all, the company offers a 30-day free trial. No registration is required and there is absolutely no obligation, giving business owners a good reason to continue celebrating all year long.

**About Halfpricesoft.com**
