Bay Ridge Toyota, one of the leading Toyota dealers in NY, announces the availability of 2008 Camry models at its showroom. The 2008 Camry is available in four-cylinder and V6 models and as Camry Hybrid, equipped with Toyota's industry-leading Hybrid Synergy Drive.

/24-7PressRelease/ - BROOKLYN, NY, April 02, 2008 - Bay Ridge Toyota, one of the leading Toyota dealers in New York, announces the availability of 2008 Toyota Camry models at its showroom. The 2008 Camry is available in four-cylinder and V6 models and as Camry Hybrid, equipped with Toyota's industry-leading Hybrid Synergy Drive.

Extraordinary features

The Camry stands out in a competitive segment with its distinctive, athletic exterior design. It is built on a 109.3-inch wheelbase to provide outstanding interior room: 101.4 cubic feet of passenger space, including 38.3 inches of rear legroom. The Camry's roomy interior shows the attention to detail that has helped this model set such high standards for sedan comfort. Controls on the two-level dash and console are easy to see and use. Large instrument panel gauges are easy to see at a glance and the odometer and trip meters are illuminated at all times to improve visibility.

The Camry's standard 2.4-liter engine develops 158 SAE horsepower at 6,000 rpm and 161 lb-ft peak torque at 4,000 rpm and can be mated to a five-speed manual transmission or an electronically-controlled five-speed automatic. (The PZEV-certified version offers 155 hp and 158 lb-ft) The DOHC 3.5-liter V6 available in the LE, SE and XLE grades deliver a substantial performance boost with 268 SAE horsepower at 6,200 rpm and 248 lb-ft peak torque at 4,700 rpm. The V6 Camry models come equipped exclusively with a six-speed automatic transmission that offers a sequential mode for manual shifting when desired.

The Camry Hybrid provides excellent value and fuel economy. Its Hybrid Synergy Drive produces a combined 187 horsepower, and this system varies power between gas engine and electric motor, or combines both, as needed. All 2008 Camry models come equipped with a standard anti-lock brake system (ABS), Electronic Brake-force Distribution (EBD) and Brake Assist, dual-stage advanced SRS airbags, seat-mounted side airbags, side-curtain airbags and a driver's knee airbag and other advanced safety features.
