**5 Men and a Sea of Acid**

EDGE Science Fiction and Fantasy Publishing announces its latest novel, *Clan of the Dung-Sniffers* by Lee Danielle Hubbard.

*Clan of the Dung Sniffers* Available April 15

**/24-7PressRelease/** - CALGARY, AB, CANADA, April 12, 2008 - Edge Science Fiction and Fantasy announces *Clan of the Dung Sniffers*, by Lee Danielle Hubbard released to major retail bookstores such as Chapters, Barnes & Noble.com, Amazon.com, and directly from the publisher: [www.edgewebsite.com](http://www.edgewebsite.com).

"My life is a grand, multicoloured web of events and interests. The upcoming publication of my first novel constitutes the brightest strands of the web." Taking her art and history studies at the University of Victoria with fervour, author Lee Danielle rises with the sun every day, takes an hour-long run or swim and gets right down to writing while most people are just getting their morning coffee.

Hubbard hasn't taken her literature exploits with any less passion, with poetry appearing in many literary magazines, including *Event* and the *Claremont Review*.

From the back of the book:

"Wounds of the body heal swiftly in comparison to those of the mind."

In a beehive of rebellion and misinterpretation eight young men are thrown together by an unlikely accident.

To survive, they move quickly to form a secret brotherhood, dubbed by one of the more cynical members as the *Clan of the Dung-Sniffers*.

Their sole mission: repair and return the damaged *Radiance* to its former glory.

But before they can do this they must survive unexpected challenges, brutal lies and the self-doubts that call into question everything they've come to know and expect from their society.

If they do not move quickly, their own beehive of prejudice and fear will devour them all.
