Birmingham, Alabama's Bear Roofing launches a new website.

Birmingham, Alabama's Bear Roofing announces it's new interactive website allowing customers to build a virtual roof.

/24-7PressRelease/ - BIRMINGHAM, AL, April 16, 2008 - Birmingham, Alabama's Bear Roofing is proud to announce its new fully interactive website www.bearroofs.com

Bear Roofing has been servicing the Birmingham area for over 25 years providing roof repair and new roof installations for residential roofing and commercial roofing.

As stated by Tommy Conzelman, Owner . . . "my new website is an invaluable extension of my business. Regardless when a potential home owner or commercial building administrator requires roofing services, we now depend on our website as our 24 hour-a-day sales force.

Residential customers can view our "Virtual Home Center" and view their home with unlimited choices of roofing shingles, siding, trim and more, right from there home or office- online.

Our new website gave us a competitive edge over the competition. Prospective customers are generally impatient and have a need for pricing, warranty information, service level information and a timetable for completion of the project.

Bear Roofing's new website allows visitors to construct their virtual roof utilizing highest quality products supplied by GAF roofing company. They can watch informative roofing videos, browse my gallery of completed projects and download complete warranty information directly from my website.

This is amazing stuff, says Mr. Conzelman, especially since so many potential customers are doing their own research before choosing a roofing supplier. We give people everything they need to research their roof right here in one spot. My website is out there day and night, crammed with all the information they need to make a decision and pick up the phone right now.

We have seen a dramatic increase in activity around here. The phone is ringing and new requests come into our eMail every day."

Bear Roofing is a certified GAF roofing company as well as a member of The National Roofing Contractors Association.
