Decadent European Casino Offers 60% Revenue Split for Affiliates

RomePartners.com, the affiliate program for RomeCasino.com, the new multi-language, multi-currency online casino designed especially for European players, is now offering affiliates the opportunity to receive an unprecedented 60% revenue split for the month of their choice.

/24-7PressRelease/ - GIBRALTAR, April 23, 2008 - RomePartners.com, the affiliate program for RomeCasino.com, is now offering affiliates the opportunity to receive an unprecedented 60% revenue split for the month of their choice.

The new multi-language, multi-currency Rome Casino, designed especially for European casino players, has more than a hundred unique games and state-of-the-art 3D graphics and sound effects and has already proven itself to be a high-converting brand.

"When an affiliate is having a great month, they can capitalize on that by taking the majority of the gross action," said Josh Cartu of Rome Partners. "The bump to 60%, which in many cases more than doubles the affiliate's revenue, and the freedom to choose when they receive the bonus, is the reason why affiliates have joined our program so quickly. At the end of each month, affiliates have the opportunity to review their revenue, and decide if that is the month they would like to receive the 60% revenue split. This way, affiliates ensure that they are getting the most value out of this offer."

Pay scales for affiliates are traditionally based on volume, and some affiliate programs have offered high revenue splits in the past. These raises typically occur for the first month, to entice potential affiliates. Unfortunately, the first month is typically the weakest month for an affiliate. RomePartners offers the high commission but the flexibility to redeem them when the affiliate chooses. That's where Rome Partners sets itself apart.

"Being able to choose which month I want to get paid the 60% split is great," said Denise of CasinoCashJourney.com. "It gives us loads of freedom. I likely won't use it until we have a surge."
