StoutKart Offers Relief From Economic Crunch

StoutKart has teamed up with Lease One Corporation to help even more customers start or add to their own business, with little or no money down

/24-7PressRelease/ - ONTARIO, OR, April 30, 2008 - With almost everyone feeling the effects of the economic slow down; think about receiving an income from your own part time or full time business. Now paired with Lease One Corporation, StoutKart can offer even more people a chance to generate an income, with little or no money down. For the past several years, StoutKart has helped numerous customers start their own businesses, (rodent control, pressure washing, welding, fencing and landscape planting services), with the help of the SK500 BackSaver units and the necessary tools for the job. Some tools included in the StoutKart line are: the Rodex Rodent Control System, portable hydraulic power stations, hydraulic augers and t-post drivers.

At StoutKart, every product we build is designed to maximize productivity, while minimizing the effort it takes to complete a job, thus reducing labor cost by trimming most two-person jobs down to a one-person task. The SK500 BackSaver offers protability not found anywhere else.
