**A SIMPLE SOLUTION TO STRING TRIMMERS' TOP PROBLEM**

*American Twister Stringless Trimmer Replacement Line System Streamlines Landscaping*

/24-7PressRelease/ - OGDENSBURG, NY, May 04, 2008 - Clean, precise edging and well-trimmed vegetation can make or break a landscape. As a result, edging and trimming are constant chores for everyone from golf course managers, groundskeepers, and corporate landscapers to independent lawn care professionals. Now, however, a revolutionary product can save these pros time and money. Tangled and jammed string trimmer lines are a thing of the past, thanks to the new trimmer replacement line system, American Twister .

Robert Livingston knew there had to be a way to avoid constantly refilling his string trimmer's spool. After careful thought and plenty of testing, Livingston developed a simple, long-lasting, and easy-to-install stringless system that fits virtually all single or double-line gas-powered string trimmers (a version for electric string trimmers is in the works). Reload in less than 30 seconds: remove old string from the spool, slip on two small but extremely strong American Twisters, pull tight, and you're ready to go. Centrifugal force keeps the American Twister in place. No replacement hardware is needed. The product is even designed so that spares can be stored right on your trimmer's handle.

Not only is American Twister more durable than conventional string, it's more economical, too. You'll save money on supplies, and you'll also save valuable time previously spent untangling and re-winding string trimmer lines.

This patented product -made in the USA- is a must for all professional landscapers, groundskeepers, and lawn care professionals. The American Twister makes trimming more enjoyable by eliminating string trimmers' most aggravating, and unnecessary, problems.

American Twister is now available by calling toll free 1-888-935-1414 or from [www.americantwister.com](http://www.americantwister.com).
