'Lights...Digital Camera...ACTIONS!' is a Photoshop Actions eBook for Everyone Using Digital Photography.

A newly-released eBook is a master collection of more than 600 image transformations, conversions and utilities created by Peter iNova, author of 9 digital photography eBooks.

/24-7PressRelease/ - WOODLAND HILLS, CA, May 09, 2008 - Peter iNova's eBooks have offered custom Actions since 2000, now he's back with 600+ Actions revised, improved and upgraded for any 6MP to 12MP shots. Many are offered for the first time in "Lights...Digital Camera...ACTIONS!" (ISBN: 1-882383-39-7).

Actions are software programs that command Photoshop, causing it to execute precise sequences of instructions. With a single click, an image can be transformed to correct a flaw, enhance an attribute or convert an ordinary shot into a phenomenal graphic.

iNovaFX Actions cover several categories. Some repair image "issues" like barrel distortion or chromatic aberration. Some enhance images by filtering out age lines or digital compression artifacts. Some Actions add effects only previously available with optical filters such as cross stars, grad filters, diffusion effects, infrared filter effects and polarized skies.

Still others transform images into convincing oil paintings, wet watercolors, precision airbrush art and advanced photo illustrations. Four series of Actions emulate the look of selected leading Hollywood motion picture treatments. "One large group takes Photoshop's own Filters and injects them with digital steroids," iNova states. "A few defy categorization entirely, like the iButterfly Action set that wraps any image into the wings of a mounted graphic butterfly."

The eBook is great news for every advanced photographer and presents three major innovations:

First, its 600+ original Actions work with Photoshop 7 through CS3 on any digital image from 6 through 12 megapixels, and most Actions work on images of any size.

Next, the entire eBook is available on CD or a fast USB 2.0 Flash Drive. Customers have preferred the USB Flash Drive option by more than ten to one. The fast 1GB Flash Drive has enough extra room to carry the entire eBook, the iNovaFX Actions and large user projects from computer to computer.

Finally, eBook images are interactive. Readers can see before/after examples changing on the page, right before their eyes. Some images have up to ten variations stacked in one spot demonstrating exactly what changes from one option to the next.

"Lights...Digital Camera...ACTIONS!"

248 pages

600+ Actions

CD: \$64

USB Drive: \$69
