FAST & EASY: KSCDOMAINS.COM Technology Upgrades Make World Class Web Hosting Service Even Better
Technology Upgrades Make World Class Web Hosting Service Even Better

/24-7PressRelease/ - SCOTTSDALE, AZ, May 10, 2008 - KSC Domain Services is offering the new Windows Server 2008 with Internet Information Services 7.0 (IIS7) software as the backbone of its Windows Web hosting product line.

The technology, which Microsoft officially launched at its "Heroes Happen Here" event in February, improves Web site performance by making more efficient use of server resources. It also provides customers with new tools to help build their Web sites, and boasts enhanced security features that augment KSCDomains.com's multi-faceted approach to protecting customers' data.

"Everyone's been eagerly awaiting this latest Microsoft Server OS." Says Steven, (Chief Exec.) "And we are excited about the benefits this will have for our customers."

KSC Domain Services has already seen a substantial increase in server performance in its initial testing of the new technology, and is excited to see it in production for its customers.

The addition of the new technology means there is no better time to develop an online presence. KSC Domain Services also makes it fast and easy with Web hosting services that are ideal for both individuals and small businesses.

Shared hosting packages feature unparalleled 24x7 Customer Support, world-class data centers and a 99.9 percent uptime guarantee.
