The verdict is in. Janeology, the new legal thriller by Karen Harrington is a hit with mystery and suspense fans

Janeology, the new novel from Kunati Books author Karen Harrington is a powerful exploration of the ways in which nature and nurture contribute to the behavior of those who commit violence.

/24-7PressRelease/ - PLANO, TX, May 11, 2008 - "Not only is Harrington a masterful conjurer of a suspenseful thriller, but she is also a wordsmith able to maintain the reader's attention and involvement in her masterful exploration of the science of psychology, genetics, and the fascination with the concept of retrocognition, all the while unraveling a mystery not unlike decoding a strand of DNA," says Grady Harp, a member of Amazon's Vine Voice program.

Rebecca's Reads also calls Janeology "A legal thriller of a style you've never read before."

ReviewYourBook.com, gave Janeology a Five-Star review saying, "Excellent...I felt as if I were sitting in the courtroom, awaiting a verdict."

About Janeology

Jane, a loving mother of two, has drowned her toddler son and is charged with his murder in this powerful examination of love, loss, and family legacy. When a prosecutor decides Jane's husband Tom is partially to blame for the death and charges him with "failure to protect," Tom's attorney proposes a radical defense. He plans to create reasonable doubt about his client's alleged guilt by showing that Jane's genealogy is the cause of her violence, and that she inherited her latent violence in the same way she might inherit a talent for music or a predisposition to disease. He argues that no one could predict or prevent the tragedy, and that Tom cannot be held responsible. With the help of a woman gifted with the power of retrocognition—the ability to see past events through objects once owned by the deceased—the defense theory of dark biology takes form. An unforgettable journey through the troubled minds and souls of Jane's ancestors, spanning decades and continents, this debut novel deftly illustrates the ways nature and nurture weave the fabric of one woman's life, and renders a portrait of one man left in its tragic wake.
