BuyCheap-DomainNames.com Offers Web Site Builder for .MOBI

Helping .MOBI Owners Build Mobile Web Sites

/24-7PressRelease/ - TEMPE, AZ, May 12, 2008 - BuyCheap-DomainNames.com offers the popular WebSite Tonight product, providing key features for those yearning to get involved in the .MOBI revolution.

Now anyone can design and create a .MOBI-compliant Web site easily and affordably. Pages designed for .MOBI are optimized for on-the-go devices, making them easy to load and navigate from the smaller, more limited screens of wireless phones and PDAs.

Companies large and small and across all industries can embrace the power of the .MOBI top-level domain. Using WebSite Tonight offered by BuyCheap-DomainNames.com, users can easily create Web sites that are formatted specifically to provide on-the-go mobile content and services. For example, Web sites that are .MOBI compliant are designed with content and graphics suited for a two-inch screen rather than a 17-inch desktop monitor. Long download times and excessive scrolling can be a thing of the past.

Other enhancements to WebSite Tonight include calendar control, photo album enhancements, animated splash pages with sound, music and video support and an expanded workspace.

For more information about the WebSite Tonight, visit www.BuyCheap-DomainNames.com.
