**Laser Hair Removal: Raleigh Laser Center Provides Painless Laser Hair Removal**

*Laser Hair Removal: Raleigh Laser Center Provides Painless Laser Hair Removal. Michael Law MD Aesthetic Plastic Surgery introduces a new device for virtually pain free laser hair removal.*

/24-7PressRelease/ - RALEIGH, NC, May 14, 2008 - Laser Hair Removal: Raleigh Laser Center Provides Painless Laser Hair Removal. Michael Law MD Aesthetic Plastic Surgery introduces a new device for virtually pain free laser hair removal.

A new development in laser hair removal technology makes laser hair removal virtually pain-free.

Serenity, a machine produced by Candela, Lasers uses gentle suction to pull the skin into a rectangular nozzle which turns off pain receptors going to the brain from the area.

People who previously had thought of laser hair removal as too painful, are now reconsidering the procedure.

The new device, combined with the two different wavelength hair removal lasers being used at Michael Law MD Aesthetic Plastic Surgery allows people of color to utilize hair removal processes. In the past, anyone with darker skin tones potentially could suffer from severe scarring if they attempted laser hair removal. But those days are gone thanks to the new technology.
