SAP B1 Business One Implementation, Software Licenses Sale USA Nationwide - Alba Spectrum

This small and mid-size business ERP deserves serious consideration as competitor to Microsoft Great Plains Dynamics GP and Small Business Financials, plus MAS 90 and Accpac from up-down and QuickBooks as if it is outgrown

/24-7PressRelease/ - NAPERVILLE, IL, May 15, 2008 - This small and mid-size business ERP deserves serious consideration as competitor to Microsoft Great Plains Dynamics GP and Small Business Financials, plus MAS 90 and Accpac from up-down and QuickBooks as if it is outgrown. Let us describe for you several nice features of SAP BO:

1. Intuitive interface. It is common that users do their own discovery after getting reasonably limited initial training in SB1 user interface. Being intuitive doesn't mean to be limited in its functionality, just opposite, SB1 covers broad number of ERP logics
2. Technical openness. Yes, you can quickly build your own custom queries to SB1 company database. Here some SQL experience is needed, but your limited SQL querying exposure will pay and you will be governing your MRP database
3. Broad ERP functionality. In fact, SAP Business One has such advanced modules as Production (you may think of it as discrete manufacturing, including such features as disassembly production orders), MRP (manufacturing resource planning wizard, where you will be surprised with its power)
4. Crystal Reports. The fact, that SB1 database is Microsoft SQL Server 2005 opens the door to Crystal Reports designers
5. Excel friendliness and reporting. This feature is available through add-on

Andrew Karasev, Alba Spectrum, <http://www.albaspectrum.com>, help@albaspectrum.com. Please visit our information portal Pegas Planet: <http://www.pegasplanet.com>, serving ERP systems community since 1993, local service in Chicago, Atlanta, Miami, San Diego, Houston, Dallas, remote support in CA, IL, IN, NY, FL, AZ, WA, NV, MI, WI, QC, ON, BC and the rest of USA and Canada.
