Stellar sponsors accounts payable conference in Melbourne, Australia

Stellar announces sponsorship of "Best Practice Accounts Payable and Procurement 2008" conference

/24-7PressRelease/ - RICHMOND, AUSTRALIA, May 15, 2008 - Stellar, a leading global call centre and business process outsourcing provider, today announced its sponsorship of "Best Practice Accounts Payable and Procurement 2008". The conference, which is organised by IQPC, will be held at Hilton On The Park in Melbourne, Australia from 19th - 20th May 2008, and will provide attendees with best practice strategies for managing accounts payable functions.

Geoff Charters, Chief Executive Officer of Stellar Business Process Solutions, will be speaking at the event on the topic of accounts payable automation.

Stellar's expertise in automating the accounts payable function will provide attendees with valuable insights into how they can reduce costs and manual handling time while increasing the process efficiency of their accounts payable function.

Although many companies offer document management solutions, Stellar is unique in that they offer a complete end-to-end accounts payable automation solution. Stellar offers the flexibility of either a hosted Application Service provider (ASP) solution or a fully outsourced accounts payable processing service, both using a transactional-based cost model. This means they are the leading choice for companies wanting to solve their accounts payable processing challenges.

Recent results for high profile clients have been extremely impressive, with one major client slashing their invoice processing time down from 2 days to 15 minutes, and cutting their end-of-month reporting from 10 days to 2 days, after implementing Stellar's hosted accounts payable automation solution. Many other clients have found that they can reduce the cost to process an invoice by up to 60% or more through the implementation of Stellar's proprietary technology solution and outsourcing their accounts payable processing.

Stellar, a pioneer in the field of document management and workflow automation, combines advanced technology and labour management expertise to automate manually intensive processes and significantly reduce operational costs.

About Stellar

Stellar is a leading global call centre and business process outsourcing provider, with over 6,000 employees across 18 outsourcing centres in Australia, UK, USA, Canada and the Philippines. Stellar's innovative outsourcing solutions help clients reduce operating costs, improve quality levels and increase revenue and profitability. The company serves a range of clients in the telecommunications, utilities, transport, finance, government and manufacturing industries. In addition to call centre outsourcing, Stellar specialises in document management, workflow automation technology and process outsourcing solutions. For more information, visit www.stellarBPO.com
