"Milton Hayward" Appoints John Cannon to Head Corporate Trading Team

Milton Hayward has chosen John Cannon, Commodities and Precious Metals expert to Partner in New Venture.

/24-7PressRelease/ - May 15, 2008 - John Cannon, possibly one of Asia's leading authorities on developing Commodities and Precious Metals based strategic investment programs, has chosen "Milton Hayward" it is believed, because of their forward thinking ecologically aligned investment programs that are renown for providing a greater than expected ROI for long term investors.

"Milton Hayward", famous for its strict internal intellectual team development program, has developed a tight supporting infrastructure model for its key investment teams. This model now being adopted by investment intuitions worldwide is believed to streamline global fundamental analysis networking distribution and enhance technical analysis provisions for investment teams through a co-efficient supporting admin infrastructure. "John Cannon", whom refers to this as a "Grass Roots" approach to managing investment portfolios, has expressed his surprise at the firm's employee enthusiasm and commitment to their client's wellbeing and investment requirements.

Sources close to "Milton Hayward" have stated that an initiative by "John Cannon" just implemented is focused on the South African Precious Metal industry for solid future investment vehicles. One such venture is the Global Gold mining conglomerate "ForGold.com", an established firm which recently commenced the implementation of a project to modernize its processing plants, using a cost effective eco friendly highly sophisticated processing technique.

Milton Hayward's analytical supporting teams have reportedly assembled several strategic investment programs for management endorsement and we are poised to see just what investment opportunities are soon to be presented by John Cannon, "Milton Hayward" and "ForGold".
