DR Recruit Me completes a recruitment contract with a Montreal based provider of mobile phone applications.

The recruitment deal was for the placement of php programmers for a growing client in the Multimedia district.

/24-7PressRelease/ - MONTREAL, CANADA, May 17, 2008 - DR Recruit Me (www.drrecruitme.com), a Montreal based firm specialized in the recruitment of qualified candidates in IT, programming, sales and marketing has announced today that it has just completed a recruitment contract for a firm offering web and mobile solutions to many of Canada's leading media companies.

The client is located in Montreal's multimedia district. " We are consolidating our growth especially among small and medium size tech companies in the booming multimedia district. We will continue to target clients in this area of the city but we will also be looking at extending our business in other major technology areas of the city such as Montreal's west island as well as the northern suburb of Laval" said Dany Raphael, founder and president of DRRecruitMe.

DR Recruit Me uses Web 2.0 tools to bring the power of technology and social networking to its own recruitment strategies. These tools are used in combination with other more traditional job posting strategies.

The agency operates most of its business online. As a result, this helps small and medium size companies save on their recruitment budget.

DR Recruit Me is a recruitment firm that specializes in the placement qualified candidates in various sectors such as Information technology, programming, corporate sales and communications. We aim to answer the needs of our clients and we can do so in many ways. Our main services include the drafting and the translation of your job wanted ad, the posting of the ad on various media outlets, the screening of all resumes received as well as full pre-screening interviews. The company also offers complete head-hunting solutions for various industry sectors.
