Audio4fun Releases 4 New Movies. Wookies Impressed.

The audio4fun.com audio and video studio continues its great work with this week's release of 4 new training videos for their award-winning Voice Changer Software. The videos are now freely-viewable from both www.audio4fun.com and www.youtube.com.

/24-7PressRelease/ - NICOSIA, CYPRUS, May 25, 2008 - They are part of a new campaign that will help users take control of all the powerful features found within this acclaimed software package. "Manuals are really important but they aren't for everybody," said Tracy Norman, Brand Manager, and now part-time movie director. "We figured that the fastest way to help get new users up and running was simply to show them all the new goodies in a brilliant movie directed by an up-and-coming, new movie director."

Voice Changer Software is an easy-to-use PC program that uses studio-quality effects combined with an ingenious voice-mapping processor to morph voices. It is an essential tool for many professional voice-over studios, as well as home jokers who like to imitate other people for laughs.

"One month on and we're still recovering from all of the April Fools' Day mayhem", said Tracey, "Everyone in the office was using Voice Changer Software and Skype to make prank calls. By noon I had declined a date with Tom Cruise, counseled Britney Spears and received no less than 3 calls from Wookies requesting a haircut."

Voice Changer Software comes in 4 different versions, from the gamer's "VoizGame" edition, right up to Voice Changer Software Diamond, which is used by professional studios, hardcore jokers, and even the odd Wookie. Free trial versions are available for download from www.audio4fun.com as well as most of the leading download outlets including www.downloads.com.
