ORGANIC LIFESTYLE MAGAZINE AVAILABLE AT www.GreenMagazines.com

Free Online Publication Connects Readers with Farmers, Health Advocates, Environmentalists, and Naturopathic Doctors

/24-7PressRelease/ - SANDY SPRINGS, GA, May 28, 2008 - Organic Lifestyle Magazine's premier issue includes an exclusive interview with Robert Cheeke, champion vegan bodybuilder. The issue also includes engaging articles on alternative health including What's Wrong With Vitamins, Why Most Vitamins You Purchase Do Nothing For You, and What Is a Healthy Diet?

"In Organic Lifestyle Magazine, you'll meet alternative health practitioners, well known health advocates, health food chefs, farmers, environmentalists, and visionaries - people who can change your life," says Michael Edwards, Editor-in-Chief and founder of the magazine.

"We are excited to provide this long overdue magazine to people who want to learn more about how to live a healthy, ecofriendly lifestyle," says Edwards. "We're getting great reviews on our first issue. Several readers have told us they just meant to take a quick look and the next thing they knew, they'd read it straight through."

While accessibility is important to Edwards, integrity is the cornerstone of the magazine. "We print the truth as we know it," he says. "In too many magazines, they don't care. They'll print any sensational article they can find based on the latest study. One month they'll say a vitamin can cure all; the next month it's ineffective. We'll never do that. "

Organic Lifestyle Magazine, the flagship magazine of Green Magazines.com, is only available online, an environmentally responsible choice now made by a growing number of publications. "The robust growth we've seen over the past three audit periods is a clear indication of broader consumer acceptance of the format," says Dave Zinman, Senior Vice President of Operations and Marketing for Zinio Systems, Inc., the recognized leader in digital publishing.
