Creating Icons is No Longer A Baffling Ordeal With New Business Toolbar Icons

Aha-Soft today announces the immediate availability of Business Toolbar Icons, a set of stock icons to trim the interface of any business or financial application.

/24-7PressRelease/ - Krasnoyarsk-10, Russian Federation, June 01, 2008 - No doubt any e-company wants to add some color to the means of its representation: programs, websites or even documents in order to make them distinctive and eye-catching. The simplest way to do so is to decorate the front-end of a product - in this case we start with icons. Creating professional and stylish icons is no easy task and requires talent, skills in design and days and sometimes even weeks of work. Fortunately, with the set of newest icons from Aha-Soft, creating a nice interface for desktop and web applications will no longer be a headache.

Business Toolbar Icons delivers the newest eye-catching and most distinctive icons that provide designers with the cost-effective "specimens" for their work, relieving them of the burdensome task of creating icons. All the icons are available for viewing and downloading and can be purchased either individually or in sets. It is possible to order custom icons of your individual design. The icons are available in the following sizes: 16*16, 20*20, 24*24, 32*32, 48*48 and formats: PNG, BMP, GIF and ICO. They also come in two variants: for websites and the old Windows versions and in 32-bit True Color format for Windows XP and Vista.

Aha-Soft offers a flexible purchasing policy. When purchased individually, each icon costs \$5 (USD). You are welcome to contact Aha-Soft with the names of the icons you would like to purchase, and the order will be processed immediately. Moreover, a collection of icons with only some of the available sizes can be ordered. In this case you will get a discount off the usual price. Minimum purchase is 2 icons. More information on the icon set can be found at <http://www.perfecticon.com/stock-icons/business-toolbar-icons.htm>.
