**Harman Corporation Offers A Custom Color Matching Process For Their Plastic Caps**

*Harman's custom color matching process allows its customers to order plastic caps in any color they need*

**/24-7PressRelease/** - ROCHESTER, MI, June 01, 2008 - Harman Corporation, the leader in vinyl plastic products and custom dip molding, now has even more to offer their customers. Harman Corporation traditionally makes caps in their eight standard colors, which are black, gray, blue, yellow, green, white, orange, and red, but they also offer custom color matching which allows them to provide any perfectly matched plastic pieces that their customers request.

Plastic caps serve many functions both in the industrial and home settings, to prevent moisture, dust, and harsh substances from damaging parts, or to cover sharp metal edges and with protective PVC end caps. Now they can even fit a customer's exact color desires.

To better fit their customer's numerous needs, Harman Corporation has a simple color matching process which allows customers to choose a color from the Pantone color chart, and match the color for use on their plastic caps.

Another way Harman Corporation ensures an exact color match is by allowing the customer to send an item of their desired color to Harman Corporation, and the color is analyzed and matched to replicate the exact color for the plastic caps.

Harman Corporation can quickly match and prototype any custom colors, materials, and tool requirements. It is easy for consumers to use custom colored plastic caps for any application, and most can be prototyped and delivered within as little as 2 to 3 weeks.

**About Harman Corporation**

Headquartered in Rochester, Michigan, Harman Corporation has been a manufacturer and global supplier of dip molded flexible vinyl products for nearly 50 years. Starting with the pioneering formulations and process equipment developed by our founder Jack Harman in the late 1950's and early 60's, Harman Corporation has been manufacturing in Rochester, MI since 1963. The company's product line includes plastic caps, grips and plugs; high temperature paint masks, custom dip molding and injection molding. A broad range of companies throughout the world finds value in Harman Corporation's experience, outstanding customer service and extensive capabilities.

Harman Corporation supplies custom and stock product protection, including plastic caps, plugs, wraps, and grips.
