Sci-Fi Channel to Feature World Premiere of New Film "100 Million B.C." on June 22

Film tells the story of scientists who discover time travel with horrible consequences when they inadvertently bring a giant carnivorous dinosaur back to modern Los Angeles.

/24-7PressRelease/ - LOS ANGELES, CA, June 17, 2008 - The Asylum (www.TheAsylum.cc), a large independent film company based in Hollywood, Calif. has announced the world premiere of its film "100 Million B.C." on the Sci-Fi Channel Sunday, June 22.

Famous for producing mockbuster films for 10 years, "100 Million B.C." (which is based off of the recent blockbuster hit "10,000 B.C.") will capture any science fiction fans imagination, as it tells the story of scientists who discover time travel with horrible consequences when they inadvertently bring a giant carnivorous dinosaur back to modern Los Angeles.

The film will also be available for purchase internationally in stores and online after its Sci-Fi Channel world premiere.

The writer and executive producers of the film are available for immediate interviews to discuss the film , as well as why they decided to make a film that would capture the hearts of minds of science fiction fans everywhere.
