Healthy Chocolate Business Opportunity Gets Help from Baseball's Wally Joyner

Healthy chocolate is a form of dark chocolate that provides the highest amount of antioxidants available in a natural food, and now anyone can join former baseball star and current coach Wally Joyner in a business opportunity marketing healthy chocolate.

/24-7PressRelease/ - SALT LAKE CITY, UT, June 18, 2008 - Healthy chocolate is a form of dark chocolate that is processed in such a way that the natural antioxidants it contains are retained.

The health benefits of a diet that is high in antioxidants are documented in many scientific and medical studies. A quick search of any search engine reveals a significant number of news reports and supporting studies for the benefits of healthy chocolate and antioxidants.

"Wally tried the healthy chocolate as a favor for a friend. He had no intention of getting involved in the business, but he discovered how this has helped the health of so many, and he knows how many people need help with their income. He just can't be quiet," explained Terri Joiner, Wally's sister. "The economy has forced people to look for ways to increase their income without making a major impact on their time and resources. Healthy chocolate gives them what they are looking for through an automated online web site that makes sales for them. It runs itself."

The Joyners and their marketing team members all have a web site that provides complete information on the health benefits of healthy chocolate, as well as information about the business opportunity at <http://www.FreedomResidualIncome.com/freedom.php>

"There are many, many business opportunities out there, and they all sound good until you run out of friends, and then you face the hard reality of business success - advertising. Without it you fail, and it can get mighty expensive. We have taken that expense away. We run ads and promotions that bring people to our web sites, and the web sites do the selling. That means people can be in business with very little impact on their time," said Terri.

The arrangement creates a team environment in which all members of the team are willing to work together to help each other because each participant can earn income from the sales of those who are in their organization.

Healthy chocolate offers improved health for people of all ages and for many conditions, and at the same time provides a good way for people to easily earn the additional income they need to keep up with rising costs and a slow economy, according to the Joyners.
