**iZ3D Sponsors Two iZ3D Monitors Custom Painted by Smooth Creations for the PDXLAN Tournament**

*iZ3D Monitors Feature New Drivers For Full 64-bit Support, CrossFireX, Plus 3D Community and Open GL Quad Buffer Support*

**/24-7PressRelease/** - SAN DIEGO, CA, June 20, 2008 -- iZ3D, LLC, designer, developer, and marketer of advanced 3D visualization systems, is pleased to announce that the company is once again a sponsor of PDXLAN 12, the largest LAN party on the West Coast. Custom painted by Smooth Creations, the two 22-inch widescreen 3D monitors are among the great prizes given for the many contests and raffles happening during the action-packed event in Portland, Oregon on July 18-21, 2008.

"PDXLAN 12 is sold out! This event features action-packed tournaments including Counter Strike, Company of Heroes, Frontline and Team Fortress 2. New this year is "MMO Annex" where 100 MMO gamers (World of Warcraft, Eve Online, etc) will play online, participate in PDXLAN contests and raffles, and check out our sponsor booths. Activities include a pizza party, plus great sponsor prizes including two fabulous custom painted monitors from iZ3D and Smooth Creations," commented Matt Conwell, founder of PDXLAN.

"iZ3D has its roots in the gaming community. We are strong supporters of PDXLAN events. The focus is on fun and they do an excellent job of providing a weekend full of it! This year we wanted to provide one-of-a-kind prizes for PDXLAN attendees to have a chance of winning. The first monitor will feature a flaming design and the second design is a secret," remarked Thomas Striegler, CEO of iZ3D, LLC.

iZ3D offers the first S-3D drivers that feature a user-friendly interface and a flexible per game profile system. Vista compatibility is achieved via full 64-bit support (32-in-64 and 64-in-64), OpenGL Quad Buffer support, 3D Community support through anaglyph, dual projector, HMD (head mounted display) and CrossFireX support.

The system is compatible with popular dual output cards. iZ3D's drivers are optimized to take advantage of Intel's latest Core 2 Duo and Intel Core 2 Quad processor technologies. The drivers also support Microsoft DirectX 8 and 9 graphics in both Windows XP and Microsoft Windows Vista .

iZ3D developed technology to create an adjustable 3D environment without eyestrain, spatial disorientation or headaches. In 3D mode, viewers can see bright, sharp 3D images simply by wearing a pair of iZ3D passive polarized glasses.

Current PC's equipped with a dual-output video card power the unit. Specifications include: 1680 x 1050 resolution; up to 170-degree 3D viewing angle; 5ms response time; 700:1 contrast ratio; and 16.7-million colors. The iZ3D 22" widescreen, 3D gaming monitor is available now via [newegg.com](http://newegg.com), [pcmall.com](http://pcmall.com) or the [iZ3D.com](http://iz3d.com) website for \$599.00.

**About iZ3D, LLC**

Headquartered in San Diego, iZ3D, LLC, develops and markets iZ3D brand products for the electronic entertainment market as well as for commercial and professional visualization applications. Three-dimensional imaging is gaining appreciable attention in the display market, and interest in the various iZ3D visualization technologies is rapidly increasing.

Due to the popularity of the initial iZ3D monitor product from Neurok Optics LLC, a US-based 3D technology developer and marketing company, a new joint venture has formed with Chi Mei Optoelectronics (CMO), a Taiwan-based leading worldwide TFT-LCD manufacturing company.

The company specializes in the design and engineering of advanced 3D visualization products, and specifically targets gamers, graphic design and entertainment as its markets. For more information, visit <http://www.iz3d.com> or call 858 646-3015.

Specifications are subject to change without notice. All other trademarks are the property of their respective companies.
