**Make Online Video bow to your will with RipTiger**

*Watching online video is now part of a routine for most internet users. Read on and learn how to make your favorite online video portable with the software like RipTiger. The program allows you to save just about any web clip to your hard drive, play it on your computer and much more.*

**/24-7PressRelease/** - KIEV, UKRAINE, July 09, 2008 - While most of the quality video migrates to the web, many of us become slaves to the countless video hosting web-sites. Either you watch a movie trailer, a new episode of your favorite show or just a random funny clip, you are stuck with the inflexible and immobile online video service.

It is reasonable of any user to ask for a service with:

1. no forced ads before each video
2. the ability to save the videos to one's computer
3. video playable on mobile devices anywhere
4. all this done in a fast and easy way

Your reasonable request can be matched with a solid solution just by doing some research.

There is software available to make any online video serve your needs, not vice versa.

The free alternatives cannot boast the extensive list of supported web-sites and aren't exactly what we call fast and easy.

Unless you are a computer guru or have a couple spare days to waste, let us focus on something more user-friendly.

There is a number of choices among the commercial software as well. Some of it still isn't intuitive enough while other doesn't offer the functionality we would wish for.

The balance may very well fall on a strong but very friendly pet - RipTiger <http://riptiger.com/>.

This program supports literally thousands of video web-sites, Youtube, Google Videos, Myspace, Hulu, Dailymotion and Metacafe being among them. RipTiger automatically downloads the videos you watch in your browser. The program interface is clean and intuitive, so everything can be done with minimum clicks. The functionality includes multiple downloads, downloads without ads, increased speed and no quality loss.

At a discount bundle price you can also get an additional program that will convert and transfer the videos to your mobile devices!

Best of all, it's 100% legal.

Explore and decide for yourself, while others may be hunting online videos with RipTiger already!
