Recorders.com Announces the Release of New Olympus Digital Voice Recorders

With advanced technology like biometric fingerprint sensing, information security is assured with Olympus's new digital voice recorders, the DS-5000 (DS-5000iD and AS-5000). Olympus, an industry leader in digital technology

/24-7PressRelease/ - Austin, TX, July 16, 2008 -- Recorders.com, the leading supplier of digital dictation equipment in the United States, proudly offers the newest line of digital voice recorders from Olympus, the DS-5000 (DS-5000iD and AS-5000). This flexible new system offers a host of upgrades that allow on-the-go professionals to significantly increase their productivity and streamline their workflow.

Voice Productivity Has Arrived

Users familiar with digital voice recording technology will swiftly come to appreciate the seamless versatility of the DS-5000. It sports a robust list of interactive features, e.g, a slide switch mechanism, USB connector, SD/SDHC and microSD memory cards, and rechargeable battery. Yet, it remains easy to use.

Its innovative technology meets the needs of busy professionals that want an easy to use single hand operation unit that allows for file editing, quick access to information and information security. The DS-5000 is ideal for medial and legal professions, which require portability, privacy and security. The Olympus DS-5000iD is equipped with an extra layer of security, a special Biometric Fingerprint Lock Function, to help keep data stored on the digital device safe and secure.

According to a Recorders.com spokesman, "The Olympus DS-5000 is one of the most exciting new professional dictation systems we offer. It was created with the needs of on-the-go professionals in mind. It addresses three distinct concerns seasoned professionals, and those who are new to this technology, may have: confidentiality; ease of use; and workflow fluidity."

Features of the DS-5000 digital voice recording system that promotes confidentiality and workflow fluidity, include:

* To promote confidentiality and security, the Olympus DS-5000 allows users to encrypt files and password protect them as well.

* As for workflow fluidity, the software allows users to archive, edit and further process recordings. There's also hands-free use capability, and files can be uploaded and downloaded quickly. There is an optional SC1 Barcode Scanner Module for the DS-5000. Users who have a barcode scanner can simply plug it into the audio device's SD card slot.

The Quality of Digital Voice Productivity

The hallmark of digital voice productivity is the ability to make recorded sound easier to hear. The Olympus DS-5000 utilizes the DSS-Pro Digital Speech Standard with an innovative QP mode. With a sampling rate of 16kHz and a compression rate of 28.0kbps, it has excellent sound quality.

Ease of Use is Key

New and experienced users will appreciate how easy this digital voice recorder is to operate. For example, users can program the functions they utilize most often onto three buttons for quick and effortless accessibility. Users can also record verbal comments in dictation. When transcribed later, the author can easily access thoughts and directives that were pertinent to the moment.

LCD Tri-Lingual Support

English, French and Spanish can be displayed on the LCD.

Accessories Shipped with the DS-5000

The Olympus DS-5000 from Recorder.com ships with a DSS Player Pro R5 Dictation Module CD-ROM, 512MB microSD Card, USB cradle, USB cable, carrying case, rechargeable battery pack, AC adapter, instruction manual and Olympus warranty card.

Pricing and Availability

The Olympus DS-5000 Professional Dictation System line retails at between \$499-\$500. Available: Now at Recorders.com.
