Results RNA Biotechnology Company Announces Silver-based Antimicrobial Detoxification

Results RNA is a leading biotechnology company offering detoxification and nutritional products. Results RNA Intra-oral sprays represent the forefront in antimicrobial and heavy metal detoxification and RNA-based nutritional technology.

/24-7PressRelease/ - OREM, UT, July 16, 2008 - Results RNA , a leading biotechnology company, has announced the availability of antimicrobial and heavy metal detoxification products for use by integrative health care practitioners to assist their patients and clients who are suffering from toxicity.

There are thousands of toxic chemicals in the food supply, and the environment in the form of solvents, emulsifiers, preservatives, cleaning solvents, detergent residues, sodium, alcohol, nicotine, carcinogenic heavy metals such as mercury, lead, cadmium, arsenic and many others, according to David Larson of Results RNA.

"Studies by the FDA, EPA and many others have shown that we have toxic chemical residues stored in the fat cells, tissues, and bones of our bodies that cannot be metabolized or excreted. As these chemicals build up, they alter our metabolism, cause enzyme dysfunction and nutritional deficiencies, create hormonal imbalances, damage brain chemistry, and cause cancer and chronic illnesses. Heavy metals and toxic chemicals are everywhere, and in everyone," explained Larson.

Newly released for use by integrative health care practitioners, Results RNA Intra-oral sprays represent the forefront in detoxification and RNA based nutritional technology, according to information on the company web site at <http://www.ResultsRNA.com>.

The technology of Results RNA Advanced Cellular Silver (ACS) 200 is licensed by sBioMed the makers of the foremost Silver-based antimicrobials in the world. The performance of sBioMed's silver-based antimicrobials formulations have been verified by the top independent laboratories in over 20 years of testing, including the labs at the U.S. Army's Dugway Proving Grounds.

"It was at Dugway in 2006 that PERADOX sterilant and disinfectant was proven to achieve a 7 log reduction (99.99999%) of anthrax spores in only 26 seconds. Independent kill time testing of ACS 200 in 2008 proves a 99.99999% reduction of MRSA (total kill) in less than 60 seconds," said Larson.

The percentage of usable nutrients made available to the body by Results RNA intra-oral sprays is much higher than capsules, pills or dermal transfer methods thus increasing efficacy and reducing bio-burden. Larson tells health care practitioners they can prescribe Results RNA detoxification or nutritional Intra-oral sprays in any combination as treatment and prophylaxis, and achieve profound results without danger of complex interactions or side effects associated with traditional pharmaceuticals.
