Unique Features, Unlimited Benefits for the new Voice Changer Software Diamond Edition

www.Audio4Fun.com - Audio4Fun (aka AVnex Ltd.) has recently upgraded AV Voice Changer Software Diamond Edition to the latest version, 6.0.28, which provides a better performance and maintains the leading position in the field of voice changing.

/24-7PressRelease/ - NICOSIA, CYPRUS, July 17, 2008 - The program can effectively change your voice in chat rooms, PC-to-Phone conversations, and online games, and will fill every day with unlimited in cyberspace. AV's Voice Changer Software Diamond Edition (VCSD) will modify any voice from a microphone, vocals from any song, or any sound on your computer by using a full selection of filters and effects that can be applied in real time. Having appeared as the first of its kind on the Internet a few years ago, AV's VCSD still stands out from other voice processors, both hardware and software, as the most trustworthy and innovative, always offering more of the best features available. Detailed information can be found at <http://www.audio4fun.com/voice-over.htm>.

Not only does AV's VCSD apply the typical Pitch and Timbre algorithm, it also provides an advanced Frequency Morpher which allows you to create hundreds of new voices by simply adjusting the frequency graph. There is also an abundant collection of tools added, including Voice Equalizer, Robot Voice, and Formant Morpher providing more choices for you to modify voice and audio for almost any purpose. One more thing that makes AV's VCSD unique is its guarantee of a high quality voice output due to the inclusion of Noise Reduction and Limiter filters. Both function efficiently as noise and distortion filters, assuring a natural, authentic and satisfying modification to the characteristics of any audio output.

"The software is not merely a voice changer but in actuality it is a powerful audio recording studio," according to Chris Redfield, Audio4Fun Lab Manager, "AV Voice Changer Software Diamond Edition can process and record your voice or music, then save those files in any sound format of your choice. The program allows advanced users to select the best audio codec, sampling rate and bit rate for their recordings." Redfield added, "This is very helpful in producing audio clips for animations, movies, animated tutorials, website demonstrations, etc. where small file size is a prerequisite. It is Suitable for both computer newbies and geeks, and AV Voice Changer Software continues to be a user-friendly and professional application and the most popular choice of the online community."

About Avnex Ltd.

Throughout many years of development, AVnex Ltd. has been promoting audio and video software technologies and specializing in three core areas: Audio and Video Morphing Algorithms, Audio and Video Stream Interception, Audio and Video Real Time Effecting.
