iLink Systems to host a repeat webinar on Environmental Management Systems due to popular demand

iLink Systems Repeats Popular Webinar on Environmental Management Systems on July 24th

/24-7PressRelease/ - BELLEVUE, WA, July 17, 2008 - iLink Systems, a leading end to end software solutions company, Microsoft Gold Certified partner and Preferred Vendor in partnership with Plateau Software, a leading environmental software company, is offering a webinar titled: "Adopting an Environmental Management System for significant improvement in efficiency and ROI". The webinar is scheduled for 9:30 AM Pacific on Thursday, July 24th, 2008. Readers can sign up now to participate in the free Webinar by visiting www.ilink-systems.com/environmentalwebinar.aspx.

For further information on the upcoming Webinar and to view archived Webinars, please visit at <http://www.ilink-systems.com/ThinkingBeyond/Webinar.aspx>.

Presenting the webinar will be Visshy Kizhapandal, COO at iLink Systems, Inc. and Brad Kleinfelder, CEO, COB (Founder), Plateau Software, Inc.

Speaker Bio:

Vish Kizhapandal, COO, iLink Systems.

Visshy has helped several large corporations with his expertise in IT consulting and strategy for well over a decade. His experience spans several industry verticals including Finance, Telecom, Government, Automotive, Healthcare and Information Technology. He has successfully led and implemented large enterprise solutions and systems, and has been a key contributor as an architect and manager on large engagements at AT&T, Verizon, JM Family, UBS, Maine Medical, NAPA and other well known government agencies. His technology expertise spans the gamut of competing and collaborative technologies from both the Microsoft and Java streams. Vish has a graduate degree in computer science from Auburn University and a bachelor's degree from BITS, Pilani, India. He also has several professional and technical certifications.

When asked why one should attend this webinar, Visshy replied "This webinar is intending at providing knowledge for large commercial as well as government organizations in building cutting edge and unique EMS IT systems and solutions. It is essential to understand how an effective design and implementation would help the organizations better manage the environmental risks and reduce the environmental impacts of its operations".

Brad Kleinfelder

Mr. Kleinfelder has over 30 years of business management experience, covering environmental consulting, consumer products, engineering, and software solutions development. While with Kleinfelder, Inc., Mr. Kleinfelder started 5 new offices and 3 new technical discipline centers. He has strong best practices knowledge and experience gained from implementing environmental products and solutions at multiple large organizations and has helped them achieve their strategic business, ROI, and performance goals.

"The webinar will help companies understand solutions that can automate expensive and labor intensive practices associated with environmental programs. As a part of the webinar, the software demonstration will show you how automating and streamlining the EMS implementation and management practice can not only reduce costs, but dramatically improve issue identification, track corrective actions in real time, and simplify reporting to a click of the mouse" said Brad Kleinfelder, CEO, Plateau Software, Inc.
