**RapideL-i now helps you convert your Power Point slides into eLearning**

*RapideL-i, the internet-based rapid e-Learning tool has been upgraded to include a new feature to convert MS Powerpoint slides into eLearning.*

**/24-7PressRelease/** - JERSEY CITY, NJ, July 17, 2008 - RapideL-i has recently introduced an MS Power Point converter. This feature allows users to import static Powerpoint presentations into RapideL-i and, at the click of a button, convert the presentation into a SCORM compliant eLearning course. This feature also allows users to add pages created using RapideL-i into the converted course.

This easy-to-use feature will immensely benefit users who currently have some part of their training material in Powerpoint and wish to convert it for deployment on an LMS. Moreover, RapideL-i enables value additions to these converted courses by providing ready to use, customizable players/shells which can be tweaked to suit one's branding needs. Apart from this, users can also add a glossary or references to the courses and use all the beneficial tools like the review mechanism, collaborative development tools, back-up tools and publish provided by RapideL-i.

RapideL-i is an internet-based, rapid eLearning content authoring platform which allows a server based collaborative development at anytime, from anywhere. Multiple users can now log on together and work simultaneously to create engaging eLearning at the speed of business. The new version is set to deliver an intuitive end user-experience coupled with a global support plan.

To register for a free trial of RapideL-i, please visit <http://www.rapidel.com>
